Table of Contents

TRACK 1: HUMAN SYSTEMS ENGINEERING

Rethinking Your Performance Improvement Mind-Set
Paul E. Rossler 3

Productivity Improvement in Repetitive Work Tasks: What Works
Biman Das 15

Team Approach to Ergonomics: A Case Study From Olin Defense Systems - LCAAP
William L. Czeschin 25

Using Ergonomics and Work Measurement to Reduce Injury in High Risk Industries
Robert M. Wygant and Bruce D. Fischer 33

Ergonomics and the OSHA Regulatory Environment
Donald S. Bloswick and Emil Golias 41

TRACK 2: COMPUTER INTEGRATED ENTERPRISE

Group Technology Applications for Computer Integrated Manufacturing
Inyong Ham 51

Numerical Control and Flexible Automation
Chao-Hwa Chang 61

Dynamic Job Allocation on Workstations with CIM-Oriented Schedule-Based Optimization
L. Kops and S. Natarajan 77

Aggregate Production Planning as a Building Block in the Strive for CIE
Michael Mizrach 83

Statistical Quality Control
Chuanching Ho, John W. Nazemetz, and Kenneth E. Case 85

A Survey of Artificial Intelligence in CIM
Osama K. Eyada and Robert A. Hanson 95

Economic Justification of CIM
John H. Geng 105

TRACK 3: TOTAL QUALITY MANAGEMENT

Benchmarking for Continuous Quality Improvement
Johnson A. Edosomwan 115

Improve Results Faster with Benchmarking
Marla E. Hacker 121

Total Quality Management Helps American Express to Improve Customer Service
Celestine A. Ntuen, Desinta Speller, and Mehdi Touhidi 125

Total Quality Management: Trends and Expectations
Gregory Hohner 129

Implementing TQM Training Through Policy Deployment
E. Joseph Farina 137

TQM - What Makes It Work?
Shirley L. Veal 145

Applying Process Capability Analyses to Develop Integrated Total Quality Management Maintenance Strategies
R. Mauro Cevenini 153

Object Based Real Time Statistical Process Control
G. M. Maggioli, T. G. Beaumariage, and C.A. Roberts 165

Capability Indices: Linking Concurrent Engineering with TQM
Norma F. Hubele, H. Brian Hwarng, and Lora Zimmer 175

TRACK 4: TEAM BUILDING

Why Self-Managed Teams Work
Thomas B. Wilson 183

Involving Employees - The Catalyst to Positive Change
Martin E. Muscatello and Gwendolyn C. Handy 191

Concurrent Engineering: Team-Building Tool for Design/Manufacture of Aircraft Engines
Yaw A. Owusu 199

Combine Teamwork and Technology to Reduce Product Development Cycle
Tony A. Hancock 209

Addressing Problems and Implementation Issues of Self-Managing Teams
Eileen M. Van Aken and D. Scott Sink 213

Dynamics and Management of Organizational Conflicts
Prasad Pathare 221

Measuring Team Performance
Robert R. Bushey and Philip Wolfe 231

Gainsharing as a Team Empowerment/Reinforcement Mechanism
Warren C. Hauck 239

Team-Based Organization: An In-Process Review
Michael D. Packer 245

TRACK 5: SIMULATION

Simulation and Total Capacity Management
A. Alan B. Pritsker 253

Unraveling the Materials Management Process Using Simulation
Louis Brennan and Surendra M. Gupta 263

Simulation of the Blow Molding and Thermoforming Processes
David O. Kazmer 269

Simulation: Reducing Work-In-Process and Increasing Machine Utilization
Sandra C. Parker and Ganesan Chengalvarayan 275

Simulation-Based Multistage Scheduling in Food Processing Industry
Sabah U. Randhawa, Sheikh Burhanuddin, and Cynthia Juwono 279

TRACK 6: LOGISTICS

It's Time to Examine Your Plants Unit Load Practices
S. Paul Singh 287

TRACK 7: LEAD TIME COMPRESSION

TRACK 8: IN PURSUIT OF PROFESSIONAL $UCCESS

Benefits - The 90s and Beyond
Barbara Z. Dick 297

Quality - A Career for the 1990s and Beyond
William A. Golomski 305

TRACK 9: RAISING PRODUCTIVITY & QUALITY CONTROL IN CHEMICAL PROCESS PLANTS

How to Implement Total Quality Management in the Process Industries
Robert A. Klein 311

The Total Capacity Management Concept: What It Can Do For You
David B. Wortman 319

Raising Quality and Productivity Via Better Maintenance
F. Kevin Bodine 333

TPM in a DuPont Fibers Plant
Fred Florian 349
